Observership
Mentor and Supervisor: Carlos del Rio MD, FACP, FIDSA
Period: November 1st, 2003 to November 30th, 2003.

Clinical Research Experience:

National Heart Institute "Ignacio Chavez", Mexico City, Mexico
Department of Cardiopulmonary Medicine
Position: Subinvestigator.
Period: February 1st, 2004 to January 31st, 2005.

I was actively involved in 4 multicenter, multinational, randomized clinical trials regarding the pharmacological therapy of different forms of pulmonary arterial hypertension (PAH). I worked with the Cardiopulmonary Department recruiting patients for different protocols, as well as making fundamental clinical decisions and analyzing the best therapy for each subgroup of patients. The titles of the studies are:

- 1.- *A randomized, double blind, placebo-controlled safety and efficacy study comparing Sitaxsentan sodium/conventional therapy to conventional therapy in patients with pulmonary arterial hypertension (STRIDE-4 TRIAL).*
- 2.- *A long-term, open label study to evaluate the safety of Sitaxsentan Sodium treatment in patients with pulmonary arterial hypertension (STRIDE-3 TRIAL).*
- 3.- *A long-term study to evaluate the efficacy and tolerability of Sildenafil Citrate in patients with pulmonary arterial hypertension (SUPER-2 TRIAL).*
- 4.- *A Phase III, Randomized, Double-Blind, Placebo-Controlled, Multicenter, Efficacy Study of Ambrisentan in Subjects With Pulmonary Arterial Hypertension (ARIES-2 TRIAL).*
